Checkin

MOBILE APP · FIELD TRAINING MANUAL

Check in, mobilize, and read your numbers

A step-by-step guide for field agents using the Checkin Android app to check voters in at events, register voters during outreach, and follow the numbers on Insights and People.

For: Field agents, mobilizers & team leads
Covers: Sign in · Check in · Mobilize · Insights · People
Version 1.0 · Uses sample data · MachineNova

Welcome

This guide is for the **Checkin mobile app** — the Android app your team uses in the field. It walks you through the four things you'll do every day: **checking voters in** at an event, **mobilizing** (registering) voters during outreach, and viewing your **Insights** and the **People** you've reached.

Every screen here uses **sample data** (dummy names and numbers) so you can learn the layout safely. Your real screens will look the same, with your own events and voters.

1 **Getting around the app**
The Home screen and the bottom bar: Home, People, Insights, Account.

2 **Signing in**
How to log in the first time and every day after.

3 **Checking voters in**
Pick an event, look up a voter by ID, confirm, and check them in.

4 **Mobilizing voters**
Pick a drive, register a voter, and watch progress to target.

5 **Viewing Insights**
Read your Check-in and Mobilization numbers, hour by hour.

6 **Viewing People**
See who you checked in and who you mobilized; filter and search.

7 **Quick reference**
Cheat sheet, messages you'll see, and troubleshooting.

NOTE

Two colours, two jobs

Throughout the app, **teal** means **check-in** (marking people present at an event) and **amber/orange** means **mobilize** (registering voters in the field). Once you see the colour, you know which job you're doing.

SECTION 1

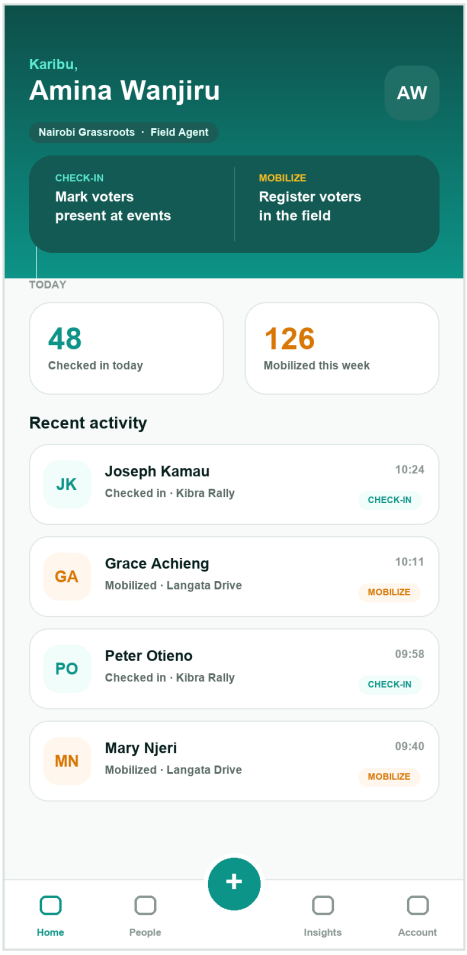

Getting around the app

The app has one home base and four tabs along the bottom. Learn these once and everything else is easy.

The bottom navigation bar

Every screen has the same bar at the bottom. Tap a tab to switch. The big **+** button in the middle starts a new check-in or mobilization.

Tab	What's there
Home	Your daily dashboard: a greeting, quick counts for today, and a live feed of recent check-ins and mobilizations.
People	The voters you've reached — two tabs: **Check-ins** and **Mobilized**. Search and filter them here.
Insights	Your numbers — two tabs: **Check-ins** and **Mobilization**, with charts by hour and by mobilizer.
Account	Your profile, your organization, notifications, change password, and sign out.
+ (center)	The action button. From Home it opens the check-in or mobilize flow so you can start scanning right away.

The Home screen (sample data) — greeting, today's counts, and recent activity. The bottom bar is always visible.

TIP

Pull down to refresh

On almost every screen you can **pull down** from the top to refresh the numbers. Use it after a busy stretch to pull in the latest counts.

SECTION 2

Signing in

Get into the app the first time and every day after.

Before you start

- A **user account** — your organization admin creates this and sends you an invitation.
- Your **email** (or user ID) and **password**.
- An Android phone with the Checkin app installed and an internet connection for signing in.

First time here? Set your password

When your admin adds you, you get an email (and sometimes an SMS) with a secure link. Open it and choose a password — that activates your account. The link is single-use and expires, so set your password soon after you receive it.

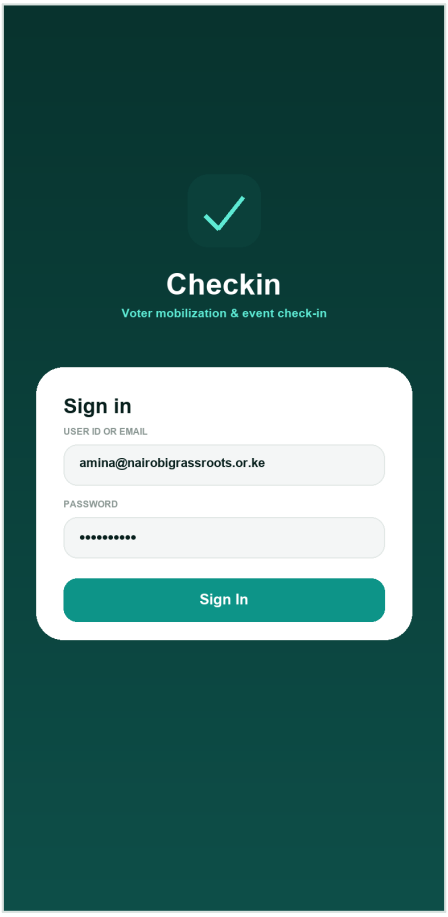

Signing in

1. **Open the app**
   Tap the Checkin icon. You'll see the teal sign-in screen with the Checkin logo.

2. **Enter your email or user ID**
   Type the email your account was created with, e.g. *amina@nairobigrassroots.or.ke*.

3. **Enter your password**
   Type your password. It's case-sensitive.

4. **Tap “Sign In”**
   The button shows “Signing in…”, then the app opens on your Home screen.

The sign-in screen — enter your email and password, then tap Sign In.

IMPORTANT

Trouble signing in

If you see “Login failed”, re-check the email and password (case-sensitive). If it still fails, your account may be inactive — contact your organization admin.

TIP

Changing your password later

Go to **Account › Change password**. Enter your current password, then your new one twice. You stay signed in after changing it.

SECTION 3

Checking voters in

Mark voters present at an event. This is the teal flow.

How check-in works

Check-in records that a voter attended your event. You look a person up by their **ID number**; the app checks them against the register, shows their details, and lets you complete the check-in. Your event numbers update instantly.

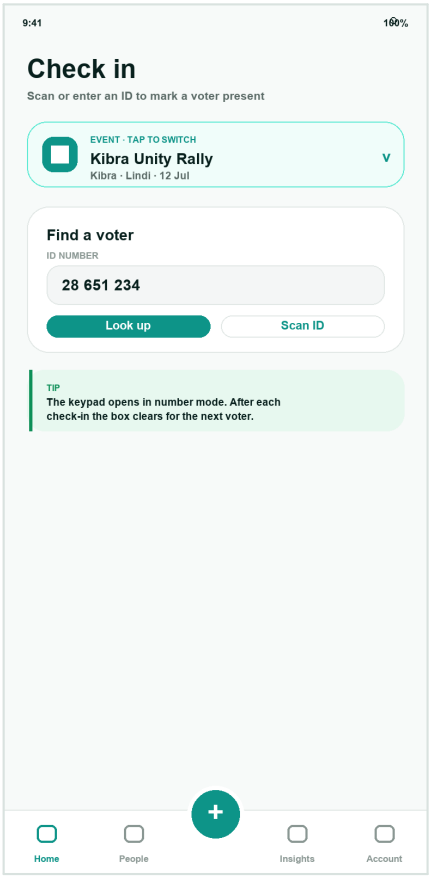

> NOTE
> **You must be assigned to the event**
> You can only check people into events you're **assigned to**. If your event isn't in the dropdown, ask an admin to assign you.

Step by step

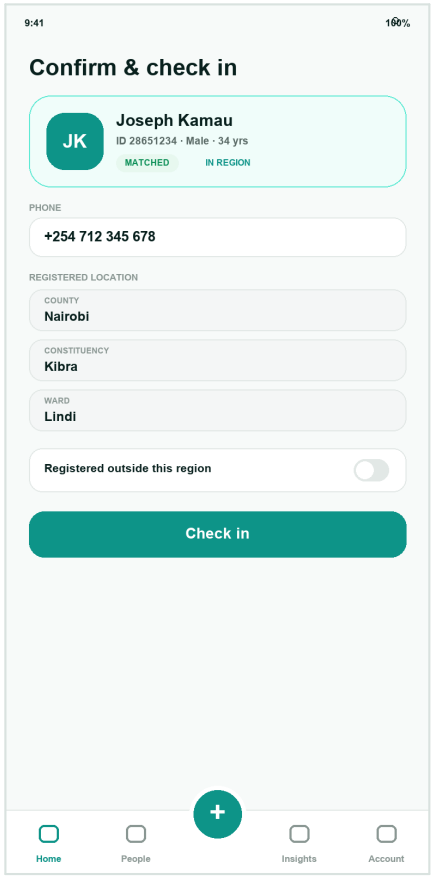

1. **Start a check-in**
   From Home, tap the big **+** and choose **Check in** (or open Check in from the menu).

2. **Choose your event**
   Tap the **Event** banner at the top to pick your event. If there's only one, it's already selected — no dropdown appears.

3. **Enter or scan the ID**
   Type the voter's ID number, or tap **Scan ID** to use the camera. Then tap **Look up**.

Find a voter — event banner + ID entry.

Confirm & check in — review, then tap Check in.

4 **Review the details**

The app shows the voter's name, sex, age, and registered location (county · constituency · ward). A badge shows if they're in or out of region.

5 **Confirm & check in**

Check or add the phone number, then tap **Check in**. A success message confirms it and the screen resets for the next voter.

6 **Next voter**

The ID box clears automatically. Scan or type the next ID and keep the line moving.

> **TIP**
> **Registered outside this region?**
> If a voter is registered outside the event's area, you'll see an **OUT REGION** flag — but check-in is **still allowed**. You can also flip the “Registered outside this region” switch and pick the correct county/constituency/ward.

Messages you may see

Status	What it means
MATCHED / IN REGION	Found and registered inside the event area — confirm and check in.
OUT REGION	Registered outside the area. Check-in still goes through; they're flagged out-of-region.
Already checked in	This person was already checked in today (shows when/by whom). Move on.
Not on the list	List-only event and this ID isn't approved — they cannot be checked in.
Can't look up	Permission or connection problem. Confirm you're assigned and online, then retry.

SECTION 4

Mobilizing voters

Register voters your team reaches during outreach. This is the amber flow.

How mobilization works

Mobilizing means **registering a voter** your team reaches in the community — door-to-door, at a market, anywhere. Each voter counts toward your **drive's target**. A voter can be mobilized **once per organization**, so the app checks for duplicates.

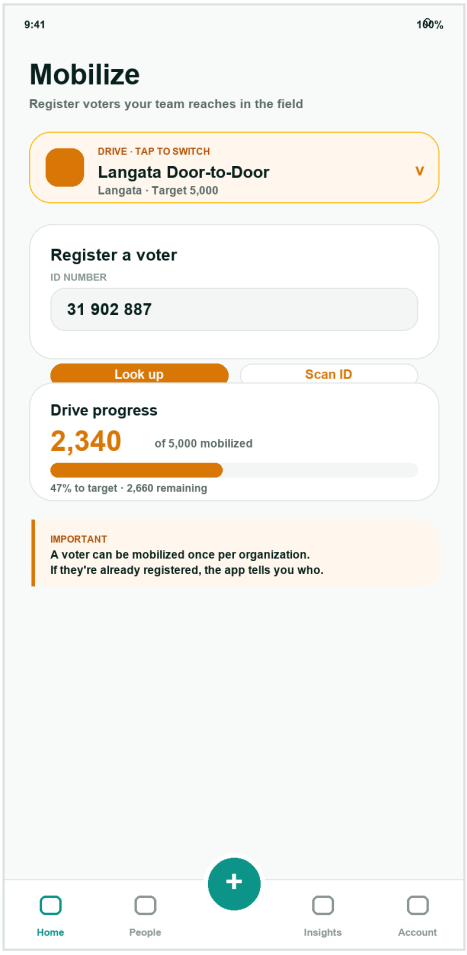

Step by step

1. **Start a mobilization**
   From Home tap the big **+** and choose **Mobilize**.

2. **Choose your drive**
   Tap the amber **Drive** banner to pick the drive/region. If you're assigned to just one, it's already selected.

3. **Enter or scan the ID**
   Type or scan the voter's ID number, then tap **Look up**.

4. **Fill the details & register**
   Confirm name, sex, DOB, phone, and location, then tap **Register**. The drive's total ticks up.

Mobilize (sample data) — drive banner, ID entry, and progress to target.

IMPORTANT

Already mobilized

If the voter was already registered, the app tells you **who** mobilized them and **in which drive**. That's the per-organization dedup protecting your numbers — no double counting.

Reading the progress card

On the card	Means
Mobilized	How many voters this drive has registered so far.
Target	The registration goal set for the drive.
Remaining	Target minus mobilized — how many are left to reach the goal.
Progress bar	The share of the target you've hit, shown as an amber bar and a percentage.

SECTION 5

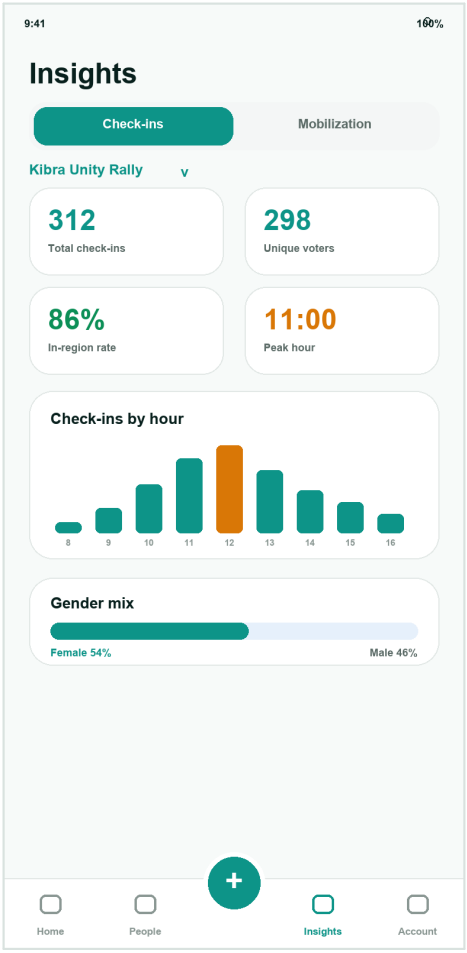

Viewing Insights

Your numbers in one place. Two tabs: Check-ins and Mobilization.

Where to find it

Tap **Insights** in the bottom bar. Switch between the **Check-ins** tab (teal) and the **Mobilization** tab (amber) at the top. Tap the event or drive name to change which one you're looking at.

Check-ins tab

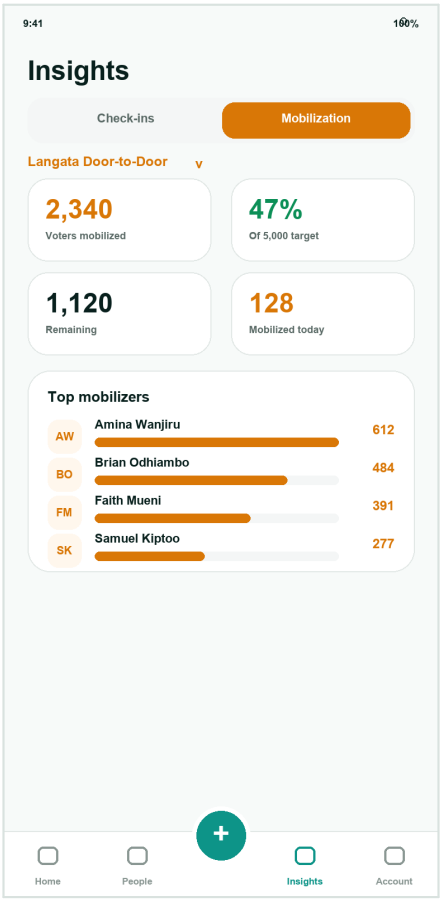

Insights › Check-ins (sample data) — KPIs, check-ins by hour, and the gender mix.

Number	Where	What it means
Total check-ins	Check-ins tab	Every time someone was checked in at this event (repeat visits counted).
Unique voters	Check-ins tab	How many **different** people checked in (same-day duplicates counted once).

Number	Where	What it means
In-region rate	Check-ins tab	The share of check-ins from voters registered inside the event area.
Peak hour	Check-ins tab	The busiest hour of the day — useful for staffing the next event.
Check-ins by hour	Bar chart	How check-ins were spread across the day. The tallest bar is the peak (shown in amber).
Gender mix	Bar	The female / male split of who checked in.

Mobilization tab

Insights › Mobilization (sample data) — drive totals and your top mobilizers.

Number	Where	What it means
Voters mobilized	Mobilization tab	Total voters registered in this drive.
Of target	Mobilization tab	Progress toward the drive's goal, as a percentage.
Remaining	Mobilization tab	How many more voters are needed to hit the target.
Mobilized today	Mobilization tab	Voters registered so far today — today's momentum.
Top mobilizers	List	Your team ranked by how many voters each person has registered.

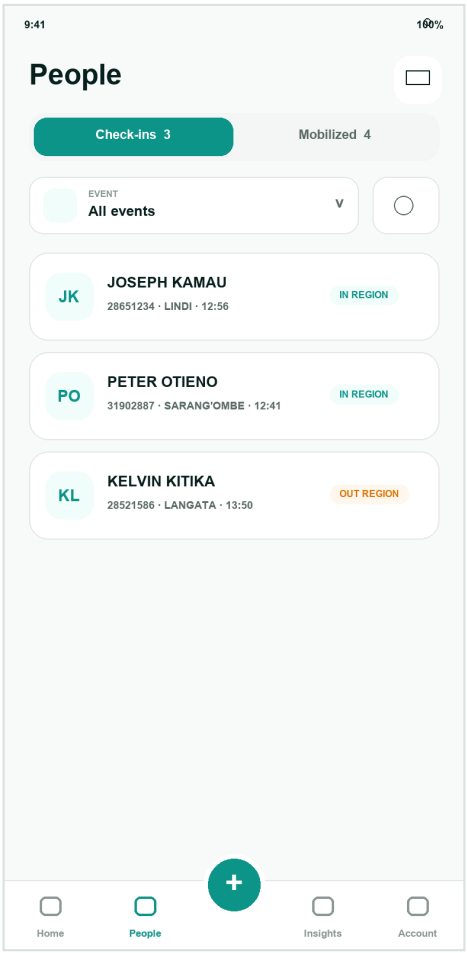

SECTION 6

Viewing People

See exactly who you've reached — checked in and mobilized.

Two tabs

Tap **People** in the bottom bar. The **Check-ins** tab lists everyone you checked in; the **Mobilized** tab lists everyone you registered. The number on each tab is the count.

People › Check-ins (sample data) — filter by event, search, and scan the list with region badges.

Filtering and searching

- Use the **Event** (or **Drive**) dropdown to narrow the list to one event, or leave it on **All events**.
- Tap the **search** icon to find a person by name or ID number.
- Each row shows the person's **name**, **ID number**, **location**, and the **time** they were recorded.
- A green **IN REGION** badge means they were registered inside the event area; an amber **OUT REGION** badge means outside.

TIP

Emailing yourself the list

Tap the **envelope** icon at the top of People to email a copy of the current list (check-ins or mobilized) to yourself for records.

Row shows	Means
Name & ID	Who the person is and their national ID number.
Location	Where they're registered (ward or polling center).
Time	When you checked them in / registered them.
IN REGION / OUT REGION	Whether they're registered inside or outside the event's area.

SECTION 7

Quick reference

The short version — keep this page handy in the field.

Check a voter in

- **+** → **Check in** → pick the **Event**
- **Scan/type** the ID → **Look up**
- **Confirm** details → **Check in** → next voter

Mobilize a voter

- **+** → **Mobilize** → pick the **Drive**
- **Scan/type** the ID → **Look up**
- **Fill** details → **Register** → next voter

If something goes wrong

You see…	Do this
“Login failed”	Re-check email/password (case-sensitive). If it persists, your account may be inactive — contact your admin.
No events / drives listed	You're not assigned to any active one. Ask an admin to assign you.
“Not on the participant list”	The event is list-only and this ID isn't approved. Confirm the ID; the admin can update the list.
“Already checked in today”	This person is done — move to the next voter.
“Already mobilized”	This voter was registered already (the app shows by whom). No action needed.
Numbers look stale	Pull down from the top of the screen to refresh.
Nothing loads / spinning	Check your internet connection and try again.

TIP

Golden rules

1) Confirm the **right event or drive** before you start. 2) An **out-of-region** warning does not block a check-in — proceed. 3) A voter can be **mobilized once** per organization. 4) When in doubt, ask your organization admin — they fix assignments, lists, and roles.

Checkin · Mobile app field training manual · © MachineNova. Screens shown use sample data; your screens may vary slightly by role and organization settings.
