Checkin

FIELD TRAINING MANUAL

How to sign in, run check-ins, and read your numbers

A step-by-step guide for organizers and check-in operators using the Checkin platform for voter mobilization and event check-in.

For: Organizers, event operators & team leads
Covers: Signing in · Event check-in · Stats glossary
Version 1.0 · MachineNova

Welcome

Checkin is one platform for your whole ground game — mobilizing voters in the field, checking them in on event day, and watching the numbers come in live. This manual walks you through the three things every field user needs: **getting into the app**, **checking voters in**, and **understanding the statistics** the app shows you.

Keep it handy on your phone or print it for your team. Each section is self-contained, so you can jump straight to what you need.

1 **Getting started & signing in**
What you need, how to log in, forgotten passwords, and first-time setup.

2 **Running an event check-in**
The full operator flow: pick an event, look up a voter by ID, confirm, and check in.

3 **Understanding the statistics**
Every number in the app explained — dashboard, events, mobilization, and analytics.

4 **Quick reference & troubleshooting**
Common messages, what they mean, and who to contact.

NOTE

Who is this for?

Anyone your organization has added as a team member. Your **role** (Owner, Admin, Member, or Viewer) and the modules you're given decide which screens you can open. Check-in operators only need Section 1 and Section 2.

SECTION 1

Getting started & signing in

Everything you need to get into the app for the first time and every day after.

Before you start

Make sure you have:

- A **user account** — your organization admin creates this and sends you an email invitation.
- Your **User ID or email** and **password**.
- A phone or computer with a web browser and an internet connection. (Field operators can also use the mobile app — see the note at the end of this section.)

First time here? Set your password

When your admin adds you, you'll receive an email with a secure link. Open it and choose a password — this activates your account. The link is single-use and expires, so set your password soon after you receive it.

> TIP
> **Didn't get the email?**
> Check your spam folder first. If it's still missing, ask your organization admin to re-send the invitation from the **Team** page.

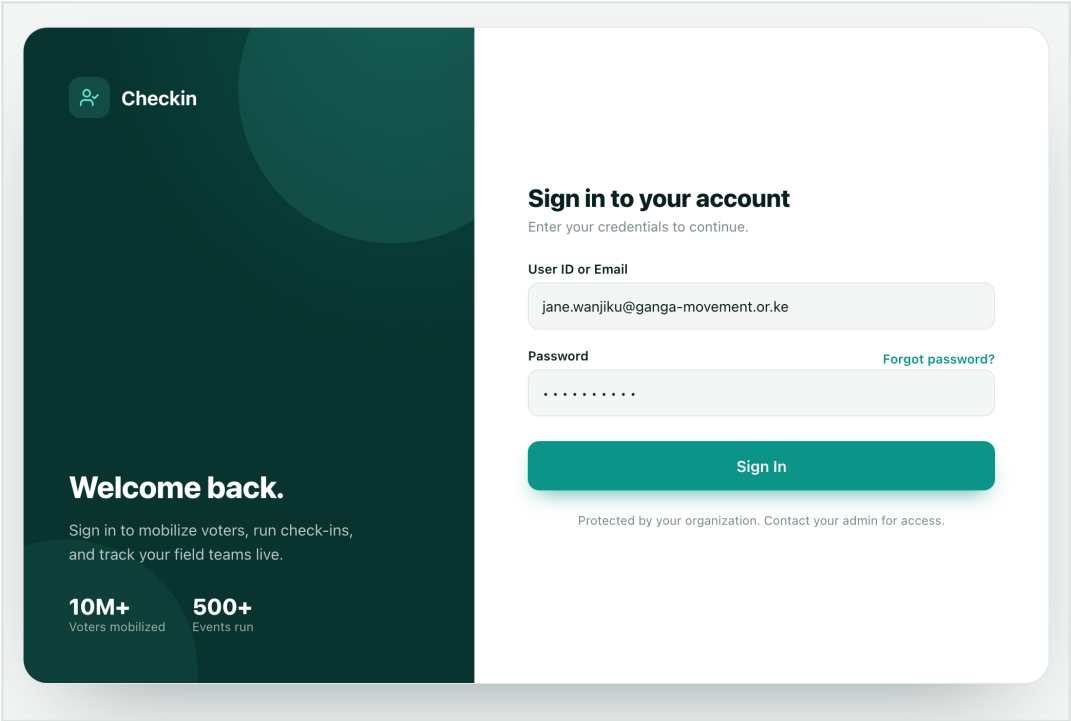

Signing in

1 **Open the sign-in page**
Go to your organization's Checkin web address and tap **Sign in** in the top right, or open the app. You'll see the sign-in screen.

2 **Enter your User ID or email**
Type the email or user ID your account was created with — for example *you@organization.or.ke*.

3 **Enter your password**
Type your password. If you've forgotten it, tap **Forgot password?** above the password box and follow the reset link sent to your email.

4 **Tap “Sign In”**
The button shows “Signing in…” while it works. When it finishes, the app takes you to the right home screen for your role automatically.

The sign-in screen — enter your User ID or email and password.

Where you land after signing in

You are a…	You'll see…
Organization staff	Your organization dashboard — a live summary of events, voters mobilized, your team, and recent check-ins.
Check-in operators	Head straight to the **Check-in** screen (Section 2) to start processing voters.
Platform admins	The Super Admin console for managing all organizations.

IMPORTANT

Trouble signing in

If you see “Login failed”, double-check the email and password (passwords are case-sensitive). If it still fails, your account may be inactive — contact your organization admin. Repeated failures can temporarily lock an account for safety.

Your role & what you can do

Your organization gives every member a role. It controls which menus you see and what you can change.

Status	What it means
Owner	Full control of the organization, including billing and team roles. One per org.

Status	What it means
Admin	Full access to events and mobilization; can manage most team members.
Member	Works day-to-day. Access to Events and/or Mobilization is granted per person.
Viewer	Read-only. Can see data and reports but cannot make changes.

TIP

The mobile field app

For door-to-door work and on-site check-ins, your organization can share an Android app with big tap targets, ID scanning, and offline support. It's downloaded from inside your organization's dashboard after you sign in — there's no public app store link.

SECTION 2

Running an event check-in

The complete operator flow — from picking your event to confirming each voter.

How check-in works

Check-in confirms that a voter belongs at your event and records their attendance. You look a person up by their **ID number**; the app checks them against the register, shows you their details, and lets you complete the check-in. Everything updates your event numbers instantly.

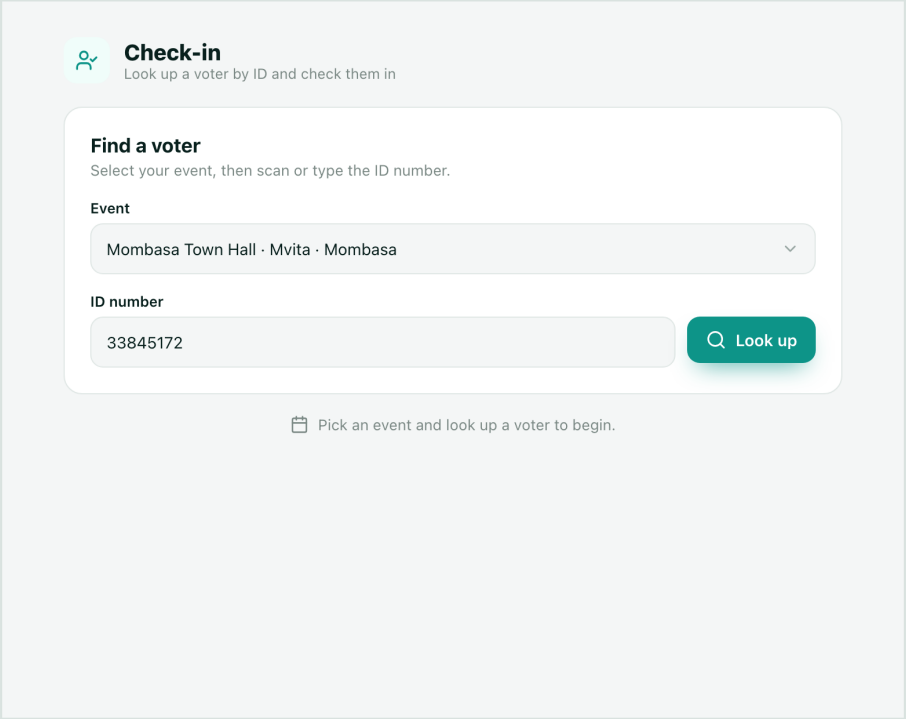

> NOTE
> **Get assigned first**
> You can only check people into events you're **assigned to**. If your event isn't in the list, ask an org admin to assign you to it.

Step by step

1. **Open the Check-in screen**
   From your dashboard menu choose **Check-in**, or open an event and tap the **Check in** button. You'll see the “Find a voter” card.

2. **Select your event**
   Pick the event from the **Event** dropdown. If you opened check-in from an event, it's already selected and shown as “Selected event”.

3. **Enter the ID number**
   Type or scan the voter's ID number into the **ID number** box, then tap **Look up**. The keypad opens in number mode to make this fast.

“Find a voter” — select your event, then scan or type the ID number.

4 **Review the voter's details**

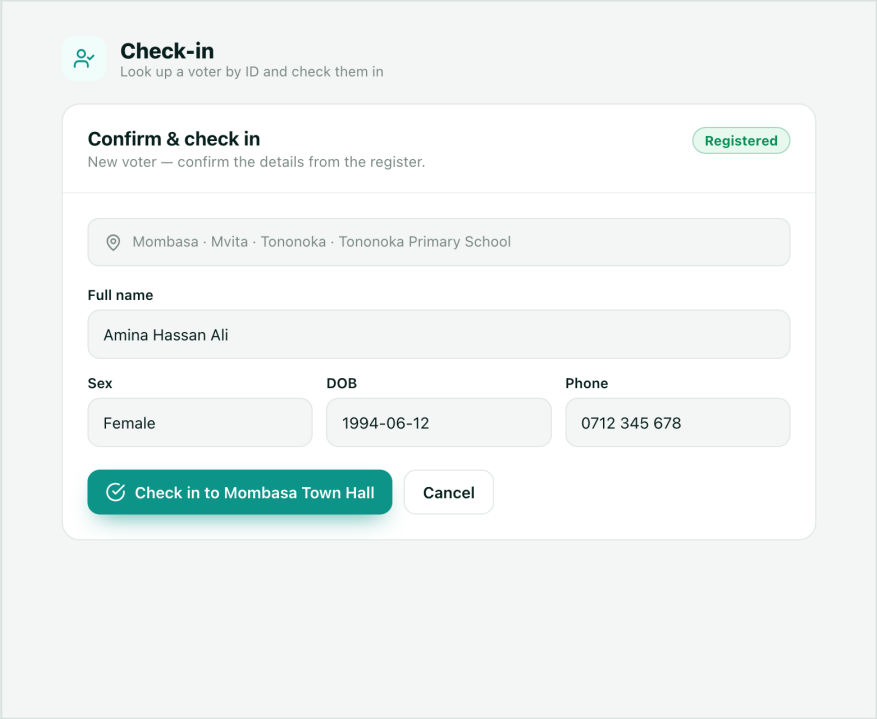

The app resolves the voter from the register and shows their name, sex, date of birth, and registered location (county · constituency · ward · polling center). A status badge shows their registration status.

5 **Confirm & check in**

Check or fill the name, sex, DOB, and phone, then tap **Check in**. A success message confirms it, and the screen resets for the next voter.

6 **Move to the next voter**

Tap **Next voter** (or just look up a new ID) to keep the line moving.

"Confirm & check in" — review the register details, then check the voter in.

TIP

Fast line tip

After each check-in the ID box clears automatically. Keep the scanner or keypad ready and work straight down the queue — you don't need to reload anything between voters.

Messages you may see during look-up

Depending on the voter and the event's rules, the app responds in one of these ways:

Status	What it means
Ready to check in	The voter was found and can be checked in. Confirm their details and tap Check in.
Already checked in	This person was already checked in today (it shows when and by whom). No action needed — move on.
Outside this region	The voter is registered outside the event's area. Check-in is still allowed; they're simply flagged as out-of-region in analytics.
Not on the list	For list-only events, this ID isn't on the approved participant list, so they cannot be checked in.
Can't look up	A permission or connection problem. Confirm you're assigned to the event and online, then try again.

Two event rules that change check-in

Event setting	What it does at check-in
Region-restricted	The event warns you when a voter is registered outside its area. The check-in still goes through — the person is flagged out-of-region so leadership can see it in the numbers.
List-only	Only ID numbers on the uploaded participant list may check in. Anyone not on the list is blocked. Admins upload this list from the event's Participant list menu.

IMPORTANT

“This organization is inactive”

If check-in is switched off, the organization has been set inactive by the platform administrator. No check-ins can be recorded until it's reactivated — contact your admin.

SECTION 3

Understanding the statistics

Every number the app shows you, in plain language — so you know exactly what you're looking at.

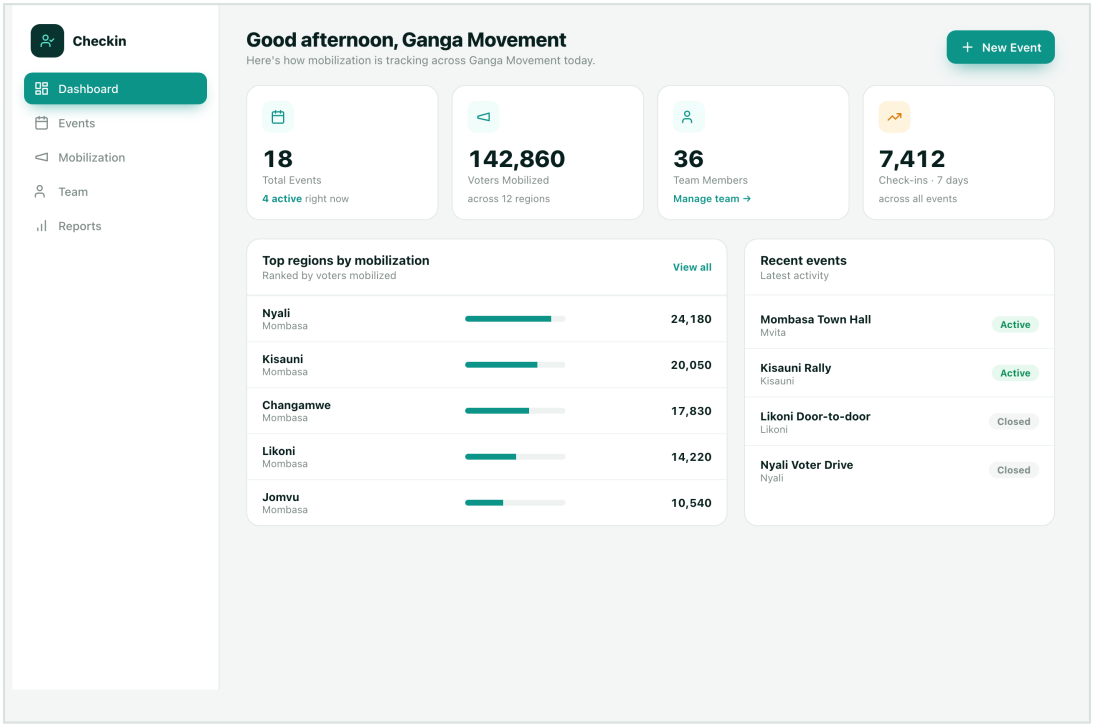

A quick vocabulary

Two words come up everywhere. Get these and the rest is easy:

Term	Meaning
Mobilized	A voter your field team has **registered** during outreach. Mobilization numbers measure your reach in the community, before any event.
Check-in	A voter **marked present at an event** on the day. Check-in numbers measure turnout at events.

Dashboard — your home screen

The four cards at the top give you the state of play at a glance.

The organization dashboard — KPI cards and top regions by mobilization.

Stat	Where you see it	What it means
Total Events	Dashboard	How many events your organization has created. The caption shows how many are **active** right now.

Stat	Where you see it	What it means
Voters Mobilized	Dashboard	Total voters registered by your field teams, added up across every mobilization region.
Team Members	Dashboard	How many people are on your organization's team.
Check-ins · 7 days	Dashboard	Total check-ins across all events in the last seven days — a pulse on recent event activity.

Below the cards, **Top regions by mobilization** ranks your regions by how many voters they've mobilized, so you can see where your strength is.

Events page

Stat	Where you see it	What it means
Total Events	Events › top	Every event, active or closed.
Active Now	Events › top	Events currently open for check-in.
Closed	Events › top	Events that have ended.
Total Check-ins	Events › top	All check-ins summed across every event.

Inside a single event

Stat	Where you see it	What it means
Check-ins	Event header	Total times people were checked in at this event.
Unique	Event header	How many **different** people checked in (duplicates on the same day are only counted once).
Out of region	Who checked in	How many checked-in voters were registered outside the event's area — shown as a share of the total.
Region-restricted	Event badge	This event warns about out-of-region voters.
List-only	Event badge	Only people on the approved participant list can check in.

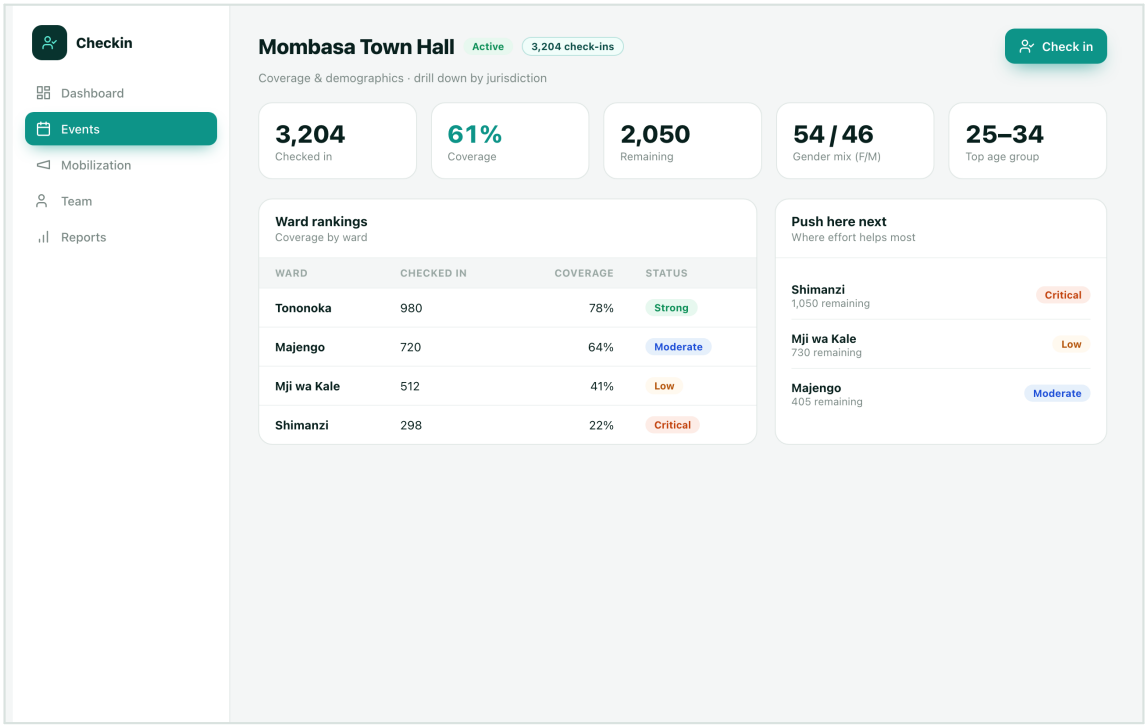

Mobilization page

Stat	Where you see it	What it means
Active regions	Mobilization › top	How many regions your team is registering voters in.

Stat	Where you see it	What it means
Boundary	Mobilization › top	The geographic scope your organization is allowed to work within.
Org status	Mobilization › top	Whether your organization is active.
Target voters	Region row	The registration goal set for a region.
Mobilized / Remaining	Region row	How many voters are registered so far, and how many are left to reach the target.
Progress to target	Region bar	The share of a region's target already mobilized, shown as a bar and percentage.

Coverage analytics (how deep you've gone)

Coverage compares check-ins against the people available in an area, drilling down by constituency, ward, or polling center.

Coverage analytics — KPIs, coverage status by area, and “push here next”.

Stat	Where you see it	What it means
Checked in	Coverage KPIs	People checked in within the area you're viewing.
Coverage	Coverage KPIs	The percentage of the area's voters you've reached.
Remaining	Coverage KPIs	How many are still to be reached in that area.

Stat	Where you see it	What it means
Gender mix	Coverage KPIs	The male/female split of who checked in.
Top age group	Coverage KPIs	The most common age band among check-ins.
Push here next	Coverage panel	The app's suggestion of where your effort will do the most good next, based on low coverage.

Each area gets a **coverage status** so you can scan the map fast:

Status	What it means
Strong	Coverage is high — this area is in good shape.
Moderate	Decent coverage, but there's room to grow.
Low	Coverage is thin — worth more attention.
Critical	Very low coverage — a priority to push.
Not started	No activity here yet.

Pace & momentum (are you on track?)

The pace panel tells you whether you'll hit your goal in time, and momentum shows whether activity is speeding up or slowing down.

Stat	Where you see it	What it means
Days left	Pace panel	Days remaining until the target date.
To hit target	Pace panel	How many more voters you need to reach the goal.
Pace needed	Pace panel	Voters per day required from now on to finish on time.
Momentum	Momentum charts	The trend of daily activity — rising, steady, or cooling off.

The pace status sums it up in one word:

Status	What it means
Ahead of target	You're moving faster than needed — great.
On track	Your current pace will reach the goal in time.

Status	What it means
Behind pace	You need to pick up the pace to finish on time.
Target reached	You've hit the goal for this scope.

SECTION 4

Quick reference & troubleshooting

The short version — pin this page up at your check-in desk.

Check-in in five taps

- **Open** Check-in → **Select** your event
- **Type/scan** the ID → tap **Look up**
- **Confirm** the details → tap **Check in**
- Tap **Next voter** and repeat

If something goes wrong

You see…	Do this
“Login failed”	Re-check email/password (case-sensitive). If it persists, your account may be inactive — contact your admin.
No events in the list	You're not assigned to any active event. Ask an admin to assign you.
“Not on the participant list”	The event is list-only and this ID isn't approved. Confirm the ID; the admin can update the list.
“Already checked in today”	This person is done — move to the next voter.
“Organization is inactive”	Check-in is disabled org-wide. Contact the platform administrator.
Nothing loads / spinning	Check your internet connection and try again. On the field app, mobilization and check-in keep working offline and sync later.

TIP

Golden rules

1) Always confirm you picked the **right event** before you start. 2) An out-of-region warning does **not** block check-in — proceed and let the numbers record it. 3) When in doubt, ask your organization admin — they can fix assignments, lists, and roles.

Checkin · Voter mobilization & event check-in · © MachineNova. This manual describes the standard field workflow; screens may vary slightly by role and organization settings.
